Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 43 is rejected under 35 U.S.C. 102(e) as being anticipated by Rajasekhar et al (6249701).

Figure 2 of the '701 patent shows a pulse circuit 214 coupled to a first electrode 317, a sense amplifier 210 coupled to a first and second electrode (317,326) via a switch 208, and a depolarization circuit 230 that detect depolarizations in the heart, such as fibrillation or tachyarrhythmia. The circuit, upon sensing such depolarizations, then produces a signal which causes the charging of the output capacitors.

Allowable Subject Matter

3. Claims 38-42,48-61 are allowed.

4. Claims 44-47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
